Job description:

This position would ideally suit someone who has a proven track record of leading design teams working on multiple projects, in delivering projects over many sectors. Used to liaising directly with clients, understanding and implementing their requirements through the rest of the electrical design team. Have a solid and highly skilled technical background from a combination of both design office and site experience, with a flair for high, low and extra low voltage electrical systems and implementing intuitive and sustainable electrical solutions. The Project Manager is responsible for the technical quality and delivery of services, and the overall development of the Electrical department within LSG Group Romania.

The Project Manager is a senior management role, accountable for contributing to the strategic leadership, operating performance, technical and people leadership of their team and discipline projects across LSG Group Romania.

The role holder will have an active role in all commercial activities necessary to ensure business growth (attend commercial meetings, prepare scope of works and resource plans on bids). The Project Manager is also responsible for the financial viability of the projects under the Electrical department. The Project Manager reports directly to the Technical Manager and to the General Manager.

Responsibilities

(major responsibilities and target accomplishments expected of the position including typical problems encountered in carrying out the responsibilities)

Business leadership

Responsible for the leadership and support of their team

Ensure the right resources are utilized effectively at the right time across their team and projects

Act as technical focal point for the discipline to ensure that communication and design processes are continually improved

Support the leadership of recruitment and selection strategies

Conduct meaningful inductions, performance management reviews and personal development plans that support the development of individuals and the business

Contribute to succession planning and career development across their team

Support the development and delivery of training and awareness sessions as required

Participate in all commercial activities necessary to ensure business growth (attend commercial meetings, prepare scope of works and resource plans on bids)

Attend and lead team and project meetings, cascade relevant information and encourage feedback from the team

Perform other related duties as required by the Technical Manager and General Manager

Project leadership

To act for the selected Electrical projects by leading and managing the successful high quality delivery of projects

Ensure proactive project planning, stakeholder and risk management takes place across projects

Supervise the team to design and execution from the projects in his portfolio.

Work with and provide direction, technical expertise and support to Electrical and other departments within the company

Ensure that statutory and regulatory requirements are met

Contribute to the completion of monthly management project reports to be issued according to deadlines

Lead technical solutions on projects

Drive innovation and utilise technological advancement

Company description:

LSG GROUP based in Austria, was originally founded as Leopold Jordan GmbH in Vienna in 1997, renamed in 2010 to LJM Building Solutions GmbH and finally restructured to the LSG GROUP.

LSG Group Romania is one of the Romanian leading professional services firms, working with investors, architects and planners and providing integrated solutions across many disciplines.

The LSG Group Romania, established in 2005, comprises over 60 permanent staff covering Mechanical and Electrical engineering and renewable energy.

Our portfolio includes landmark projects throughout Romania such as:

- ♣ Premium Plaza - Bucharest
- ♣ Premium Point Bucharest
- ♣ Metropolis Center – Bucharest

- ♣ AvantGarde Office - Bucharest
- ♣ FCC Sky Tower Bucharest

- ♣ FCC Office Bucharest

- ♣ Benta Office Building – Targu Mures

Our clients include property developers, businesses, architects and planners.

They look to us to provide a range of services to help them respond to the challenges of a fast-changing world, and to anticipate the demands of the future.

We are continuously strengthening our team and invite professionals with suitable working experience in the engineering fields covered by LSG Group Romania to join us and develop together with us.
